

PROJECT PROFILE EAST TEXAS CHEMICAL PLANT MANAGEMENT

Client: **INEOS STYROLUTION** | Location: **BAYPORT & TEXAS CITY, TEXAS**

For its facilities in Bayport and Texas City, Texas, [INEOS Styrolution](#) enlisted Audubon for on-site chemical plant management. The [in-plant team](#) provided robust operational, capital project, [owner's engineering](#), [turnaround](#), and [construction management](#) support.

Audubon's on-site project managers handled more than \$60 million worth of capital projects for INEOS Styrolution, in addition to procuring vendors. Familiarity with site practices, procedures, and standards allowed the identification of professionals who integrated seamlessly with the owner's project and operational teams.

The operational, procurement, and project management support supplied by Audubon enabled the global styrenics supplier to achieve more effective, efficient operations at its East Texas chemical plants.
